OSC Martin was deployed to a Chlorine release at the Magnablend Texas Liquid facility in Waxahachie, TX. The facility is operated by Univar. Yesterday afternoon a 300 gallon tote of Sodium Chlorite began off gassing and employees initiated emergency procedures which included evacuation and notification to the Fire Department. When the FD arrived the tote ruptured triggering the facility "Deluge System". Some of the material was washed into a low lying area near the facility. The FD setup a ½ mile evacuation perimeter. EPA START Contractors began air monitoring and at approximately 1830 the evacuation was lifted. EPA and Contractors have demobed from the site.

January 27, 2015

Tuesday

All Day McKay, Tom McKay, Tom SPCC inspections, recons, and outreach in Oklahoma, Osage, and Tulsa Cos., OK

All Day Adams, Adam Explo and/or UBEx -- N LA
